CJCL ♥ 1430
A TELEMEDIA STATION

January 23, 1987

Mr. William A. Burrows,
709 Division Street,
GLOUCESTER CITY, New Jersey,
United States of America
08030

Dear Mr. Burrows:

We are pleased to confirm your reception (your letter dated May 25, 1986...sorry it took so long, I just found out that there have been a few DX letters sitting to be done).

Our transmitter is located on Centre Island at North Latitude 43 degrees, 37 minutes, 3 seconds, and West Longitude 79 degrees, 22 minutes, 47 seconds. Our transmitter is a CONTINENTAL 317C and we operate on a parallelogram with six self supporting towers. The towers are 150 feet high.

We do not issue QSL cards, but hope this inforamtion is of use to you.

I am enclosing a promotional kit which I'm sure you'll find fascinating. And to answer your question, yes, we do receive quite a few DX letters!

We are always pleased to hear from our distant listeners and we appreciate your taking the time to write us.

Sincerely,

Sheila Brazys
